The Relias LMS for Community Health Centers

Powered by modern technology, the Relias learning management system (LMS) boosts compliance and measurably impacts performance for community health providers.

Unrivaled Content with CEs and CMEs

The Relias LMS is home to training content for 20+ disciplines, including these professionals:

- Nursing
- Medical Assistants
- Social Workers
- Physicians
- Case Managers
- ...and more

We keep up with regulatory changes, so you can focus on delivering quality care. Our Accreditations Department is specifically dedicated to monitoring state and federal mandate changes and preserving the compliance of our courses.

Bonus! Because our courses are accredited, your staff has unlimited access to free CEs and CMEs to meet their licensing and certification needs.

Automated Enrollment and Delivery

The Relias LMS integrates with your HR system to ensure a smooth onboarding process. From day one, new hires are automatically enrolled and assigned required courses to meet compliance.

Once your new hires clear the orientation phase, the Relias LMS automatically converts the courses to annual training. Automated email alerts are sent to remind staff about upcoming and overdue courses.

Comprehensive Tracking and Reporting

The Relias LMS helps you track and manage everything in one place, including licensures, certifications and live training events. Real-time dashboards monitor course completions by job title or department.

During a survey or audit, quickly access and print critical information using any of our 20+ built-in, customizable reports.

Don't forget corporate compliance!
Our Policy and Procedures Management tool allows you to upload, assign, review, and report on your organization's P&Ps and keep current with version control.

DEVELOP STAFF COMPETENCY TO IMPROVE PERFORMANCE

The Relias LMS has the content and tools you need to master compliance and focus on building a stronger workforce capable of delivering better client care and outcomes.

HRIS Integration

Save valuable time by linking the Relias learning management system to your HRIS for automated training plan enrollments and employee updates.

Requirements Tracker

Simplify the way you keep track of non-training requirements (for example, licenses and certifications) to maintain compliance and ensure care is provided without interruption.

Assessments

Improve hiring, onboarding and retention with pre- and post-hire assessments for key positions within your organization. Assessments help you, determine the best fit for your organization before you hire them, improve onboarding effectiveness with identified areas of focus for training, and provide opportunities to existing staff for ongoing professional development.

Mobile App

Access courses, BrainSparks®, Pro on the Go and participate in social learning conveniently on a mobile device.

Competency Tracker

Measure proficiency and track improvement on specified behaviors.

Policies & Procedures Management

Automate your P&P management to track and report on P&P compliance as easily as training compliance. From version control and approval processes to staff assignments, you can do it all in one system.

Skills Checklists

Evaluate, track, and monitor skills on the job using a consistent set of checklists.

Online Course-Building Tools

Create your own courses using our PowerPoint converter, certificate builder and streaming video server for improved performance. Relias can even build custom content for you to meet agency or state-specific regulations.

Course Libraries

Provide continuing education and meet compliance and regulatory needs. Relias has hundreds of courses developed for adult learners with innovative and advanced interactivity to improve learners' knowledge retention and performance.

Gaming Elements

Motivate staff to complete training on time with friendly competition.
