Tangible Benefits of Medicaid Expansion on CHCs, Providers & Patients

Expand Patient Services

- *Build capacity to deliver more comprehensive services, such as behavioral health, dental, substance use disorder treatment, and/or mobile medical units.*
- *Reach more patients in current and growing service areas, improving community health, economic development, and quality of life.*

Strengthen Operations & Workforce

- *Reduce uncompensated care and increase financial stability.*
- *Create new jobs and better recruit and retain a diverse workforce in underserved areas.*
- *Decrease job-related stress/burnout for providers who serve patients who can't afford treatment plans.*

Improve Health Outcomes for Our Patients

- *Expand health coverage to over a half million low-income North Carolinians, incl. single parents & veterans.*
- *Achieve better health outcomes, including lower maternal & infant mortality rates, with more care access.*
- *Remove the strain of health care costs from working individuals & parents, allowing them to reinvest those funds in the economy.*
